TECHNOLOGY & RO WATER PURIFIERS

# ABOUT US

Delivering the highest possible quality product has always been Mercy Appliances' main priority. We have also made an effort to include cutting-edge technology into our products. We offer unrivalled design and reliable quality.

Through our kitchen appliances, MERCY Appliances aims to make every Indian healthy and maintain purity in their lives. It is renowned for its inventive designs that improve the quality of daily life and for its robust technological performance, which has come to be synonymous with providing purity.

In our cutting-edge production facility, we conduct research, develop, and redefine the effectiveness of our products. To prevent contamination, we uphold the highest standards of quality and cleanliness. Each product is created, put together, and rigorously tested in our quality control lab in a sterile atmosphere.

## WHY CHOOSE MERCY APPLIANCE?

With its long history in Indian kitchens, Mercy Appliances has consistently worked to provide housewives with the newest technologies and provide a pleasant and enjoyable cooking experience. We are continually innovating because we strive to truly understand our customers' wants and requirements. Mercy Appliances has developed its leadership in producing better products for its customers by constantly looking into the possibilities of new designs, technologies, features, and innovations.

Our extensive nationwide network of dealers and service facilities guarantees dependable service and support for the highest level of customer satisfaction. Products from Mercy Appliances promise less fuss and more effective working. Because of this promise and its complete fulfilment, it has become a well-known and adored household name in the nation, making it the obvious choice for its clients.

## Our Collection Range of Chimneys

The Collection Range of Mercy Appliances features high performance, beautiful materials, and excellent design. Your ability to cook will be improved, and you'll love it more.

A variety of chimneys under the collection range improve kitchen appearance. With filter less, dry heat auto clean technology these are incredibly fine and high-end chimneys.

The kitchen space looks better because to the distinctive design with the black tempered glass. Some versions' automated glass opening vent systems add to the aesthetic. These chimneys are the best in their category because to their stainless-steel oil collector, double ball bearing system, dual vent suction, and high-performance motor.

# LET **PURITY** SPEAK FOR ITSELF

## WATER PURIFIER

**Autoclean  
& Backwash**

The Autoclean function cleans the RO membrane everytime the machine is switched on & using Backwash function one can clean the carbon and sediment filters without dismantling the machine

**RO+UV+UF+  
TDS Control**

This feature sets a new standard of purity with Reverse Osmosis(RO), advanced UV technology and activated carbon to purify water

**Mineral  
Addition &  
pH Balance**

Kutchina Water Purifiers maintains the pH level of water and also adds back important minerals like calcium and magnesium using it's mineral addition technology

**Digital  
Display**

The Digital Display gives information such as ROAV function, tank full, in process & filter change
